

# NPR Report Parser

The NPR Report Parser is a free utility. It allows you to identify all associated reports for a given NPR report. During my adventures as NPR report writer; I've experienced frustration finding all reports associated with a report I'm working on. Problems I've experienced are:

- Reports not working after being moved to LIVE.
- Reports passed onto others sent incomplete.

NPR Report - Extract Report Names & Macro Calls from MAGIC Source Code  
[Download Instructions in PDF Format](#)

To use the NPR Report Parser:

- Use the NPR main menu to download your report to your pc workstation.
- Browse to the NPR Report Parser: <http://comstock-software.com/NprSourceParser.aspx>
- Use the **Browse** button to find your NPR report file. Click Open.
- Click the **Parse File** button to see the macros, reports & report fragments for your report.
